A dictionary is a reference book about words and as such it describes the functioning of individual words (sometimes called lexical items). It does so by listing these words in alphabetical order in the form of headwords, the words listed as entries in the dictionary.

A sport is commonly defined as an athletic activity or skill and involves a degree of competition, such as tennis or basketball. Some games and many kinds of racing are called sports. A professional at a sport is called an athlete. Many people play sports with their friends. They need coaches to teach or train teams or individuals how to do better. Sports can be played indoors or outdoors and by individuals or teams.
